## **Private Expedition to MOUNT ACONCAGUA** **(22834 fasl / 6962 masl)**

**Aconcagua climb via POLISH GLACIER TRAVERSE Route ("Two Faces")**

**Vacas Valley + Upper Guanacos + Plaza Argentina + Camp 1 & 2 on Polish Route + Traverse to Normal Route + Summit + descent via Normal Route**

## Introduction

An alternative and beautiful path. Aconcagua will express its most rustic side, as an adventurous spirit will enlighten the trail with every step. We will walk across the Vacas Valley up to Plaza Argentina base camp. Then we follow the Polish Glacier route up to Camp 2. Crossing the mythic base of the Polish Glacier we will take the Normal Route, in the last stretch, up to Camp 3. From there we will try the Summit. The descent follows the normal route, knowing the famous Plaza de Mulas base camp. This special trail, for special people.

## Why a Private Expedition?

The main characteristics of this type of expedition is that you choose the date of departure and you share it only with your fellow climbers. Most of the services are included and you have your own guide, which is very important as he will provide you with vital information, security and ensure a harmonized rhythm in your climb.

-

## The Best of the Expedition

- A program that gives you the opportunities to succeed.
- The opportunity to visit the Aconcagua on one of its most beautiful and less visited faces.
- The Aconcagua Mountain is the highest mountain in America and is part of **The 7 Summits Circuit**. This consists of climbing the highest mountains of each continent.
- An excellent chance to test yourself at an altitude of up to 23,000 feet, which is a great stepping stone for climbing the Himalaya mountains of 26,000 feet.
- The opportunity to visit both base camps in Mt. Aconcagua, Plaza Argentina in the Polish Route and Plaza de Mulas in the Normal Route.
- Porters for common gear to altitude camps. Most of the groupal gear (tents, kitchen sets, stoves, ropes and the garbage produced for the group) will be carry to altitude camps for a team of porters. This helps you to save energy to achieve your goal.

## Difficulties

**Technical difficulty:** climbing Aconcagua via Polish Glacier Traverse route does not present any technical difficulty. Even though in this expedition you take some part of the Polish Glacier, you do not require a previous climbing experience on rocks or ice.

**Physical difficulty:** as in the Normal or Northeast route the process of acclimatization is really important in order to succeed in getting the summit. As this is a factor on any of our expeditions, the only pre requirement would be to follow a program of training that is adapted to the activity that you are going to make. The rest of the program is planned in order to make you enjoy and know one of the most beautiful traverse in the Aconcagua mountain.

**Other types of difficulties:** the biggest problem that you may face on your expedition are the effects of the altitude on your body. These can be overcome with a previous and correct acclimatization to Aconcagua climb, which is a factor on any of our programs. Another difficulty are the low temperatures on the mountain, the effects of which are reduced with a high-quality clothing and equipment.

## Important

Going to Mount Aconcagua is one of the most wonderful experiences a person can live. There, one can know oneself and those around deeply. A general but essential advice for those who want to climb this mountain: to be aware that what matters is not the summit, but walking towards it step by step, without being exposed to danger because preserving our heart healthy is what makes sense to the adventure. And if we reach the summit, it is really amazing. Then, for it to be worthy, the important thing is to start again, step by step, from hill to hill, from year to year, because the mountains, like life, are infinite and generous and they deserve to be shared among friends.

## Itinerary

(Height in feet - meters above sea level)

It includes: **B:** Breakfast / **L:** Lunch / **PL:** Packed Lunch / **D:** Dinner

### Day 1: Mendoza (2,508 f - 760 m)

Drive airport or bus station / Hotel in Mendoza. Lodging. In the evening there will be an instructive talk about the Aconcagua Mountain and the guides will check your equipment. Time to rent or buy some equipment if you need.

### Day 2: Mendoza / Penitentes (8,992 f - 2725 m)

Obtaining of permits. Transfer to Penitentes. Lodging in hotel. Preparation of the loads for the mules. (B, L, D)

### Day 3: Penitentes / Pampa de Leñas (10,230 f - 3100 m)

Drive to Quebrada de Vacas. Beginning of the trekking to Pampa de Leñas. (B, PL, D)

### Day 4: Pampa de Leñas / Casa de Piedra (11880 f - 3600 m)

Trek to Casa de Piedra. (B, PL, D)

### Day 5: Casa de Piedra / Plaza Argentina Base Camp (13200 f - 4000 m)

Trek to Plaza Argentina base camp. Lodging. (B, PL, D)

### Day 6: Day 6: Plaza Argentina Base Camp (13200 f - 4000 m)

Resting day in Plaza Argentina. (B, L, D)

### Day 7: Plaza Argentina / Camp 1 (16335 f - 4950 m) / Plaza Argentina

Acclimatization trek and transportation of the material to Camp 1 and return to Plaza Argentina. (B, PL, D)

### Day 8: Plaza Argentina Base Camp (13200 f - 4000 m)

Resting day in Plaza Argentina. (B, L, D)

### Day 9: Plaza Argentina / Camp 1 (16335 f - 4950 m)

Climb to Camp 1. (B, PL, D)

### Day 10: Camp 1 / Camp 2 - Upper Guanacos (18095ft -5500m) / Camp 1

Acclimatization trek. Lunch and return to Camp 1 (B, PL, D)

### Day 11: Extra day

Extra day for contingencies as bad weather that may prevent the normal development of the program. (B, L, D)

### Day 12: Camp 1 / Camp 2 - Upper Guanacos (18095 f -5500 m)

Climb to Camp 2. (B, PL, D)

**Day 13: Camp 2 (18095 f - 5500 m)**

Resting day in Camp 2. (B, L, D)

**Day 14: Extra day**

Extra day for contingencies as bad weather that may prevent the normal development of the program. (B, L, D)

**Day 15: Camp 2 / Camp 3 (19740 f - 6000 m)**

Climb to Camp 3 by making a traverse to the Normal Route. (B, PL, D)

**Day 16: Extra day**

Extra day for contingencies as bad weather that may prevent the normal development of the program. (B, L, D)

**Day 17: Camp 3 / SUMMIT (22974 f – 6962 m) / Camp 3**

Climbing day from Camp 3 to the summit using the Normal Route and returning to Camp 3. (B, PL, D)

**Day 18: Camp 3 / Plaza de Mulas base camp (Normal Route) Descent from Camp 3 to Plaza de Mulas base camp, in the Normal Route. (B, PL, D)**

**Day 19: Plaza de Mulas base camp / Puente del Inca / Mendoza**

Descent to Puente del Inca. Drive to Mendoza. Lodging in the hotel. (B, PL)

**Day 20: Transfer to the airport**

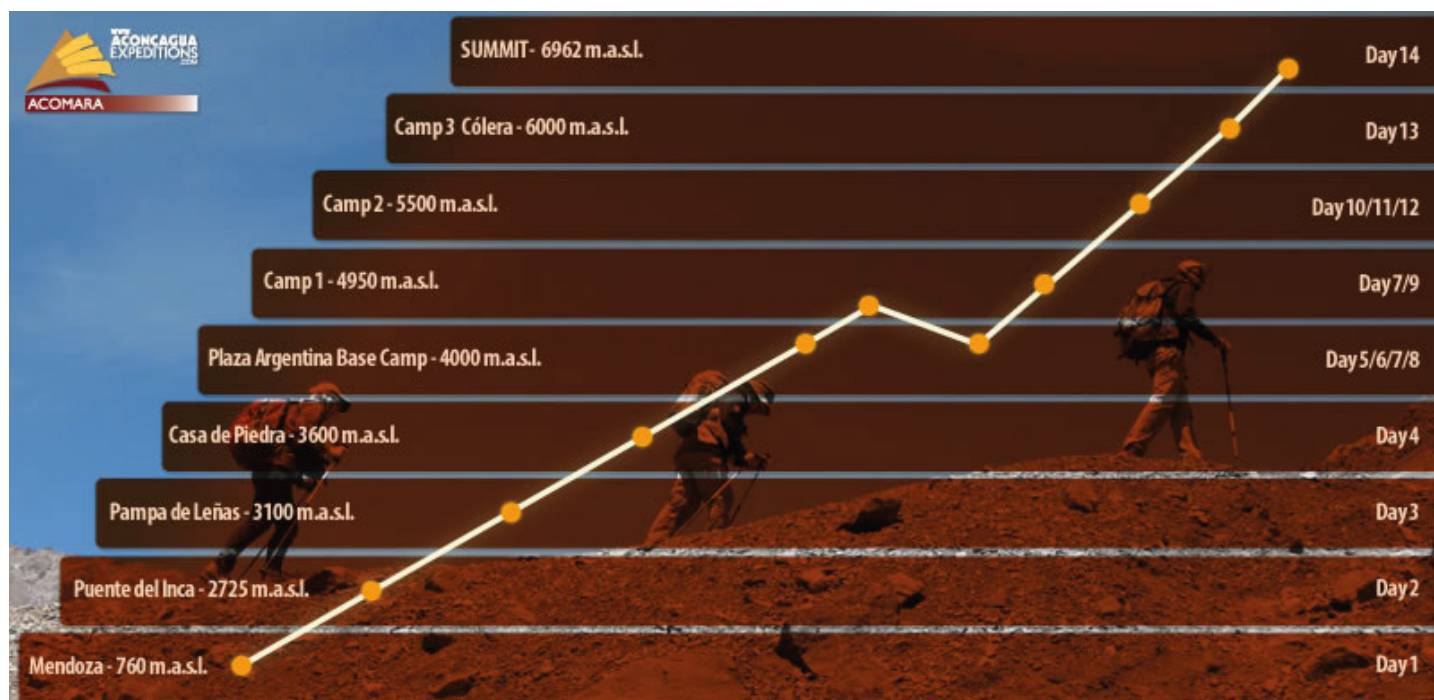

Transfer from the hotel to the airport. (B)

---

**NOTE:**

the above itinerary is intended as a guideline only. Although every effort will be made to adhere to it, changes may be caused due to weather conditions or other unforeseen events. Please be flexible if necessary.

## INCLUDED SERVICES

### Transfer airport or bus station / hotel / airport or bus station

One of us will be waiting for you at the airport or bus station to drive you to the hotel, allowing you the possibility to enjoy your trip fully. And after the expedition, we will take you back to the airport or bus station.

### Assistance and support for lost luggage recovery

You will have all the necessary support to retrieve their luggage as soon as possible. In Acomara-AconcaguaExpeditions we know the importance of the equipment for the success of the expedition and the extra costs which may entail having to rent or purchase again. While the loss of baggage is a responsibility of the airlines, our Customer Support Staff will assist you in Mendoza for the fast recovery of it.

### Hotel in Mendoza

While you are in Mendoza city, you will be lodged in a 4 stars superior Hotel for 2 nights in a double room (the first night of the itinerary and the last night of your itinerary after climbing down from the mountain). Breakfast and taxes are included and will represent no additional cost. Nonetheless, if you wish a different type of room or service, you can acquire it as an additional service.

### Assistance to buy the climbing permits

Mount Aconcagua is located in a provincial Park managed by the Provincial Government of Mendoza. To get into the Park you should get a permit in accordance to the activity that you are going to participate in (climbing, long trek, short trek). This procedure must be done personally, as a government rule. Each climber must go to the Park's office with their own passport.

### Luggage care

If you wish to leave certain personal belongings that you are not going to use during your Aconcagua expedition, you can count on the best security of the hotel of your expedition for leaving your personal effects. You will also be able to leave your possessions in Penitentes/Puente del Inca or in Base Camp.

### Transfer Mendoza / Puente del Inca / Mendoza

A private transfer will pick you up from your hotel and take you to Puente Del Inca. We will drive over 180 kilometers, which separate Mendoza City from Puente Del Inca (roundtrip). The scenery on the journey is one of the most spectacular landscapes in the central Andes.

### Meals

On the expedition you will enjoy all the meals (B: Breakfast / L: Lunch / PL: Packed Lunch if we are on the move / D: Dinner) that are carefully planned by professionals to have a balanced diet during those days on the mountain. The cooks always prepare every meal, with fixed menu from day n° 3, except at the high altitude camps where the guides will be in charge of the cooking. You will enjoy tasty and large portions of very good meals. If you are vegetarian, let us know.

### Lodging in Penitentes/Puente del Inca

During the Inca Empire this spot was a strategic point for the crossing of the Andes mountain. Over the last years it has become the point of departure of every expedition, whose aim is to get the summit of Mount Aconcagua. The Hotel was built here, it is located in this strategic zone, five kilometers far from the Mount Aconcagua Park trailhead. You will spend one night in this beautiful place at the beginning of your expedition in shared rooms with a private toilet. Complete breakfasts and dinners in the restaurant of the hotel are also included. Our private transfer will take you to the Aconcagua Park entrance.

### **Assistance for the arrangements of loads to be transported by mules**

Our mountain guides will advise you on when you have to decide what to include in your luggage and the way that we are going to arrange it on the mules.

### **Load mules**

These strong animals were the ones that helped the armies that fought for the freedom of South America, to transport their belongings over the mountains. Mules move over mountain with great caution, having the possibility to carry big loads. The negative aspect of these animals is their untamed character. That is why we have selected a professional team of muleteers, called "arrieros", who have dedicated their lives to the country animals. They know how to deal with these animals, because of their experience. From Puente Del Inca to Confluencia, from this camp to Plaza de Mulas, and in the return your belongings will be carried by mules. Each mule can carry up to a limit of 60 kg, and every client may transport on the mules a maximum of 30 kg on each stage of the approach. We strongly recommend you to bring a strong duffel bag.

### **Transfer to the Aconcagua trailhead**

You will be driven by a private transfer over 5 kilometers, from the hostel in Puente Del Inca to the first Rangers Station. Here your permit is checked out and you are informed about the park rules.

### Camps in Pampa de Leñas and Casa de Piedra

While you are gaining height, your body needs some time to start with the process of acclimatization to Aconcagua climb. Therefore, it is extremely important to stop for a night in Pampa de Leñas and the following day continue with the trek to Casa de Piedras. In every stop you will meet the Arrieros, who will give you your gear to spend the night. The guides will help you in the setting of the tents, and will prepare the dinner and breakfast.

### Base Camp in Plaza Argentina

Once you have arrived at Plaza Argentina, you will spend 4 nights in the campsite. It's fully prepared to make the trip around the magnificent South American mountain as comfortable as possible. There are tents for eating, kitchen, equipment storage. Toilets are available too. An excellent team of people will attend you, preparing delicious meals and providing you an excellent service. The advantages of the campsite are not only its commodities, but also the direct contact with nature.

### **IMPORTANT – It includes porters for altitude camps**

Our expeditions to Aconcagua include porters to transport the common equipment and garbage in the days specified in our itinerary. With the goal that our climbers can trek from camp to camp with less weight and concentrate their energies on summit day, this expedition includes the help of porters. Porters appear with the need of people and expeditions that due to their logistical characteristics have to transport a large amount of equipments to the altitude camps. Porters are very strong people who work in the high altitudes of Aconcagua. Most of them have reached the summit many times and the reaction of their body to the altitude is evidently quicker and better than many athletes. Porters are responsible for transporting the garbage and most of the common gear of our expeditions (tents, meals, kitchen sets and stoves) from Plaza Argentina base camp to Camp 1, from Camp 1 to Camp 2, from Camp 2 to Camp 3 and the return from Camp 3 to Plaza de Mulas base camp. Each member of the expedition has to carry his or her personal equipment (backpack, sleeping bag, boots, etc). Anyway, if you want the help of a porter to carry your personal backpack with your personal equipments, please don't hesitate to consult us (it shall be considered an optional not included service and it may have additional cost).

### **The Guides (See more information about them)**

The guides in charge of the expedition are professionals who have obtained their degree from the AAGM or the EPGAMT (2 and 3 year careers). We believe that one of the keys for having a successful expedition is to count on people who have the best qualifications and at least 5 years of experience in Aconcagua to provide safety and trek across the paths of nature with conviction and professionalism. Our expeditions are leadered by one high altitude mountain guide per every three climbers from base camp. The guide's equipments include a VHF radio, first aid kit complete with the specific medications for altitude sicknesses, ropes, altimeter, digital oxymeter and professional clothing and equipments. Medicines will be provided after the aproval of the doctors of Park Aconcagua. All of this is necessary for your safety and well being.

## **Bed service and use of mattresses Therm-a-rest in the altitude camps**

Always looking to give you the best service to facilitate your success, Acomara-AconcaguaExpeditions includes service bed at base camps and the use of self-inflating mattresses Therm-a-rest for the altitude camps resting. This will certainly help with better sleep which results undoubtedly in a better recovery of power during the rest time. To learn more about mattresses please follow this link: [www.cascadedesigns.com](http://www.cascadedesigns.com)

## **Tents**

Normally, during the summer high-season, Mount Aconcagua is a mountain with good weather conditions. Yet if you happen to have a few days of storms, you will be responsive to nature's whims at high altitudes. Therefore, we will be sure to provide you with the highest quality tents at these high altitude campsites. The expedition includes The North Face and Mountain Hardware tents, which have proved to work well for over the years. Usually two climbers will sleep in each tent, but if the guide considers it necessary, a maximum of three climbers may sleep in one tent. To learn more about North Face VE 25 tents please follow this link: [www.thenorthface.com](http://www.thenorthface.com) and for Mountain Hardware Trango tents please follow: [www.mountainhardware.com](http://www.mountainhardware.com)

## **Pitching the tents in altitude camps**

Once the comfort in base camp Plaza de Mulas is left behind, it starts the hardest stage of the expedition which is the ascent to the different altitude camps towards the desired summit. So, it is essential that you save all your strength only for the most important: to focus on the ascent. That is why we pitch the tents for you on the altitude camps, that is to say when the expedition arrives to these camps, the tents will be ready for you to rest, to protect yourself from the cold weather and to wait the refreshing meal the guides will prepare.

### **Filtrate of water for consumption at altitude camps**

The available water for consumption at altitude camps in Aconcagua comes from small reservoirs or from the snow. This water is rarely contaminated with bacteria, but it does have a high content of clayey sediments, which might cause diarrhea or gastrointestinal infections when entering the organism. That is why in all our private expeditions the water for consumption is filtered with the very efficient water microfilters MSR MiniWorks EX, getting rid of the sediments and other strange elements which might exist on the water, getting away the possibility of sickness and deceases. For further information about the filters MSR MiniWorks EX visit [www.cascadedesigns.com](http://www.cascadedesigns.com)

### **Extra days**

There are three extra days that can be used on the mountain in case of bad weather conditions or contingencies which could delay the regular itinerary. Since the climbers' safety is our main priority, the leader guide will be in charge of taking this decision.

### **Communications**

The expedition take advantage of satellite phones, VHF and BLU radio lines that help to stay in contact between the high-altitude campsites, Plaza de Mulas, Confluencia, Puente del Inca and Mendoza. Therefore, almost instantaneously answer to whatever issue that may arise.

### **Solar Panels to recharge batteries during the entire expedition**

The last place to recharge the batteries of electronic devices before ascending towards the altitude camps is the base camp Plaza Argentina. From there, there is no way to get electricity, unless solar energy is used to generate it. So, all our private expeditions have mini portable solar panels which serve to generate electricity to recharge all kind of electronic devices, such as cameras, smartphones, Ipad's, Ipod's, satellite phones, tablets, etc. The last thing we want is not to have enough electricity to take the summit picture.

### **Farewell dinner**

At the end of the expedition, the whole group will share a dinner in one of the restaurants in Mendoza in order to celebrate the new friendships.

### **Participation or Summit Certificate**

We will extend you a certificate signed by the Guide of the expedition and the Ceo of Acomara-AconcaguaExpeditions certifying that you have participated in the Mount Aconcagua expedition (or reached the summit if that happened).

### **Medical and pharmaceutical support in Mendoza City**

Your safety and health is our priority. If you need to be evacuated from Aconcagua for medical reasons or you finish your expedition with any kind of medical condition, our team will provide you personal bilingual support for all medical activities you need to do after returning from the Aconcagua like assisting you if you need additional medical attention, medical studies like lung x-rays, shopping medicine, hospital admission, etc. The expenses arising from hospital admission, medical studies, doctor's fees, ambulances, medicines, etc. are not included.

In addition, you will be able to use our optional service of full bilingual assistance for your time in Mendoza until you fully recover. The objective is that you feel completely accompanied and content until you fully recover your physical health and you are able to return to your home country.

### **Support in Mendoza after your Expedition**

After you return from your expedition to Aconcagua and your services for the expedition finish, our customer support team will continue to assist you with everything you need in Mendoza City.

## NOT INCLUDED SERVICES

### Climbing Permit

The only way to enter the Mount Aconcagua Park is by getting the permit personally in Mendoza city. If the ticket is not used within the dates established by the Park authorities, the money will not be returned. The ticket will be invalid in the future years. The entrance fee's payment support the maintenance and care of Mount Aconcagua Provincial Park and aid to preserve and protect it. It also supports the maintenance of the medical, the park rangers and the rescue service (helicopter).

### Extras

Those extra expenses like food or drinks separate from those specified in the program are not included.

### Expenses emerging from abandoning your scheduled itinerary

The itinerary includes group services in order to provide more and better services at a low price. When you abandon the itinerary of your expedition for any reason (like personal reasons, health, etc.) you begin to use private services. If you abandon the itinerary, the company covers the transportation from Puente del Inca to Mendoza City by line bus free of charge. The second hotel night in Mendoza city included in your expedition can be used at this moment. If you need extra hotel nights, private transfer or other services originated by the abandonment of the expedition, they shall be considered additional services not included in the price of the expedition. They may be mules from Plaza Argentina or Plaza de Mulas to Puente del Inca (USD 480 or USD 240 each), personal guide to go down with you from Plaza Argentina (USD 500), private transfer from Puente del Inca to Mendoza city (USD 240), medicines, doctor and ambulance fees outside the park, etc.

### Personal equipment and Sleeping bag

Your personal equipment is not included in the expedition. You can bring it from your country or you the option of either purchasing or hiring all gear needed for your expedition once you are in Mendoza. We will help you with this. The list of this recommended gear is shown further on this page.

### Personal Insurance

Having a personal insurance is not a fundamental requirement to climb the Mount Aconcagua. However, we suggest that you to contact an insurance company if you wish to get one, taking into account the risk in the mountain.

### Porters for personal equipment

The porters may help you to transport your belongings from a camp to another one offering you a better result on the mountain. So do not hesitate in letting us know, if you decide to take one. The price will depend on the stretch that your equipment will be carried.
